TURFCO T5000 SPREADER / SPRAYER APPLICATOR

Powerful, productive, large-capacity stand-on sprayer/spreader lets you tackle larger properties, sports fields or commercial areas with a 60 gallon spray capacity and up to 325 lbs. of granular capacity that fits through a 48-inch gate.

The T5000 is built for larger properties, with its 60-gallon sprayer and 325-pound spreader capacity coupled with a powerful 22-hp engine delivering speeds up to 7 mph. The intuitive, steering wheel drive system provides outstanding stability on hills, eliminates turf-tearing which is a problem with zero-turns, and reduces training time to save business owners thousands of dollars per year. New operators can be trained and fully operational in less than a week.

The new T5000 is designed to make your staff more productive. The unique steering wheel design allows operators to get more consistent results while completing more properties in a day. It maximizes operator performance and comfort with the industry's only hands-free speed control.

This is the only machine that sprays up to 300,000* square feet per fill. Stay on target with the only high-velocity, large droplet spray and our unique granular hard trim. Reduce downtime with a time-tested all mechanical drive, no electronics and rugged, easy-to-service design.

*With optional 3-In-1 Tank attachment
